Bluetooth

2500mAh

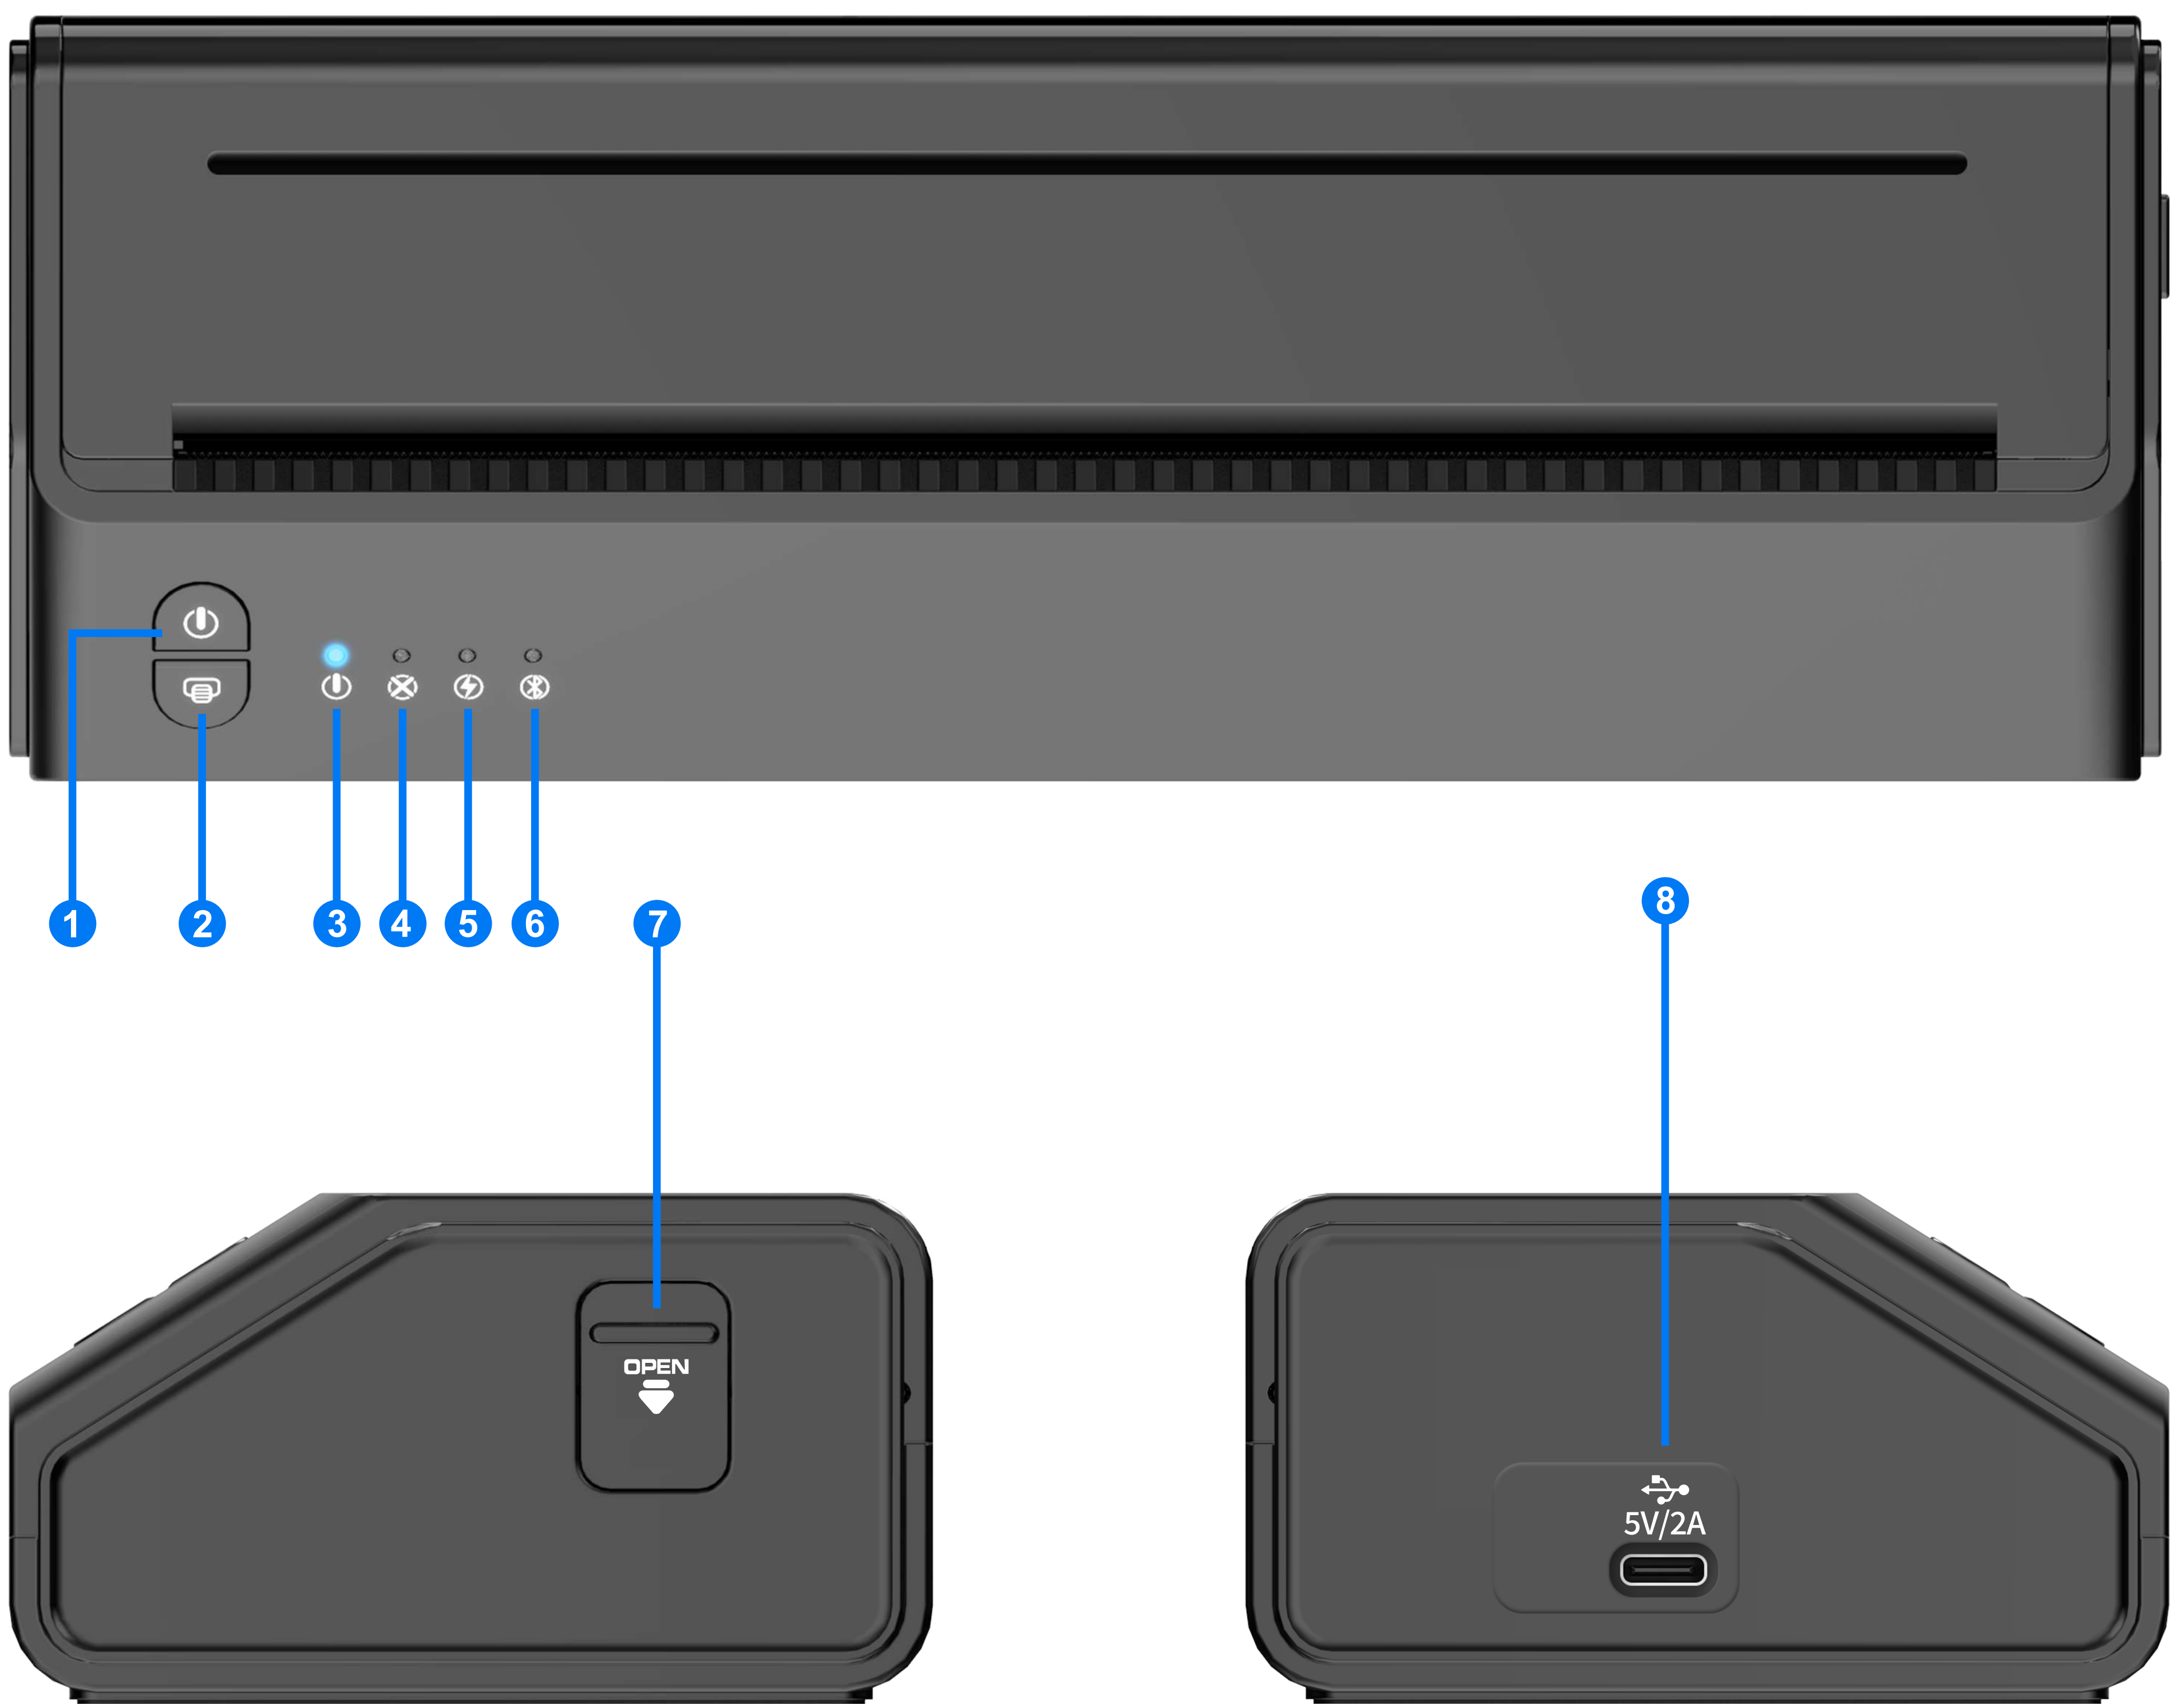

Exclusive App

# Appearance and components

## Indicator lights and button operation

1. Turn on/off button  
(long press button)
2. Paper output button
3. Power light
4. Error light

5. Charging light
6. Bluetooth light
7. Open button (drop-down) ↓
8. Charging port (Type-C/USB)

Light and Button	Situation
Power light	Blue light is on all time when turn on.
Charging light	Blue light when charging, Full charge blue light out.
Error light	Blue light is on when you do not place the transfer paper correctly. When the power is low or there is no power, the error light will be on.
Bluetooth light	The connection is always bright / Turn off when not connected

# Operating instructions

## Notes on paper placement

1. Long press the power button to turn on, and press "↓" the open lid button to open the lid, the power light and Error light on.

2. Take out the transparent protective page.

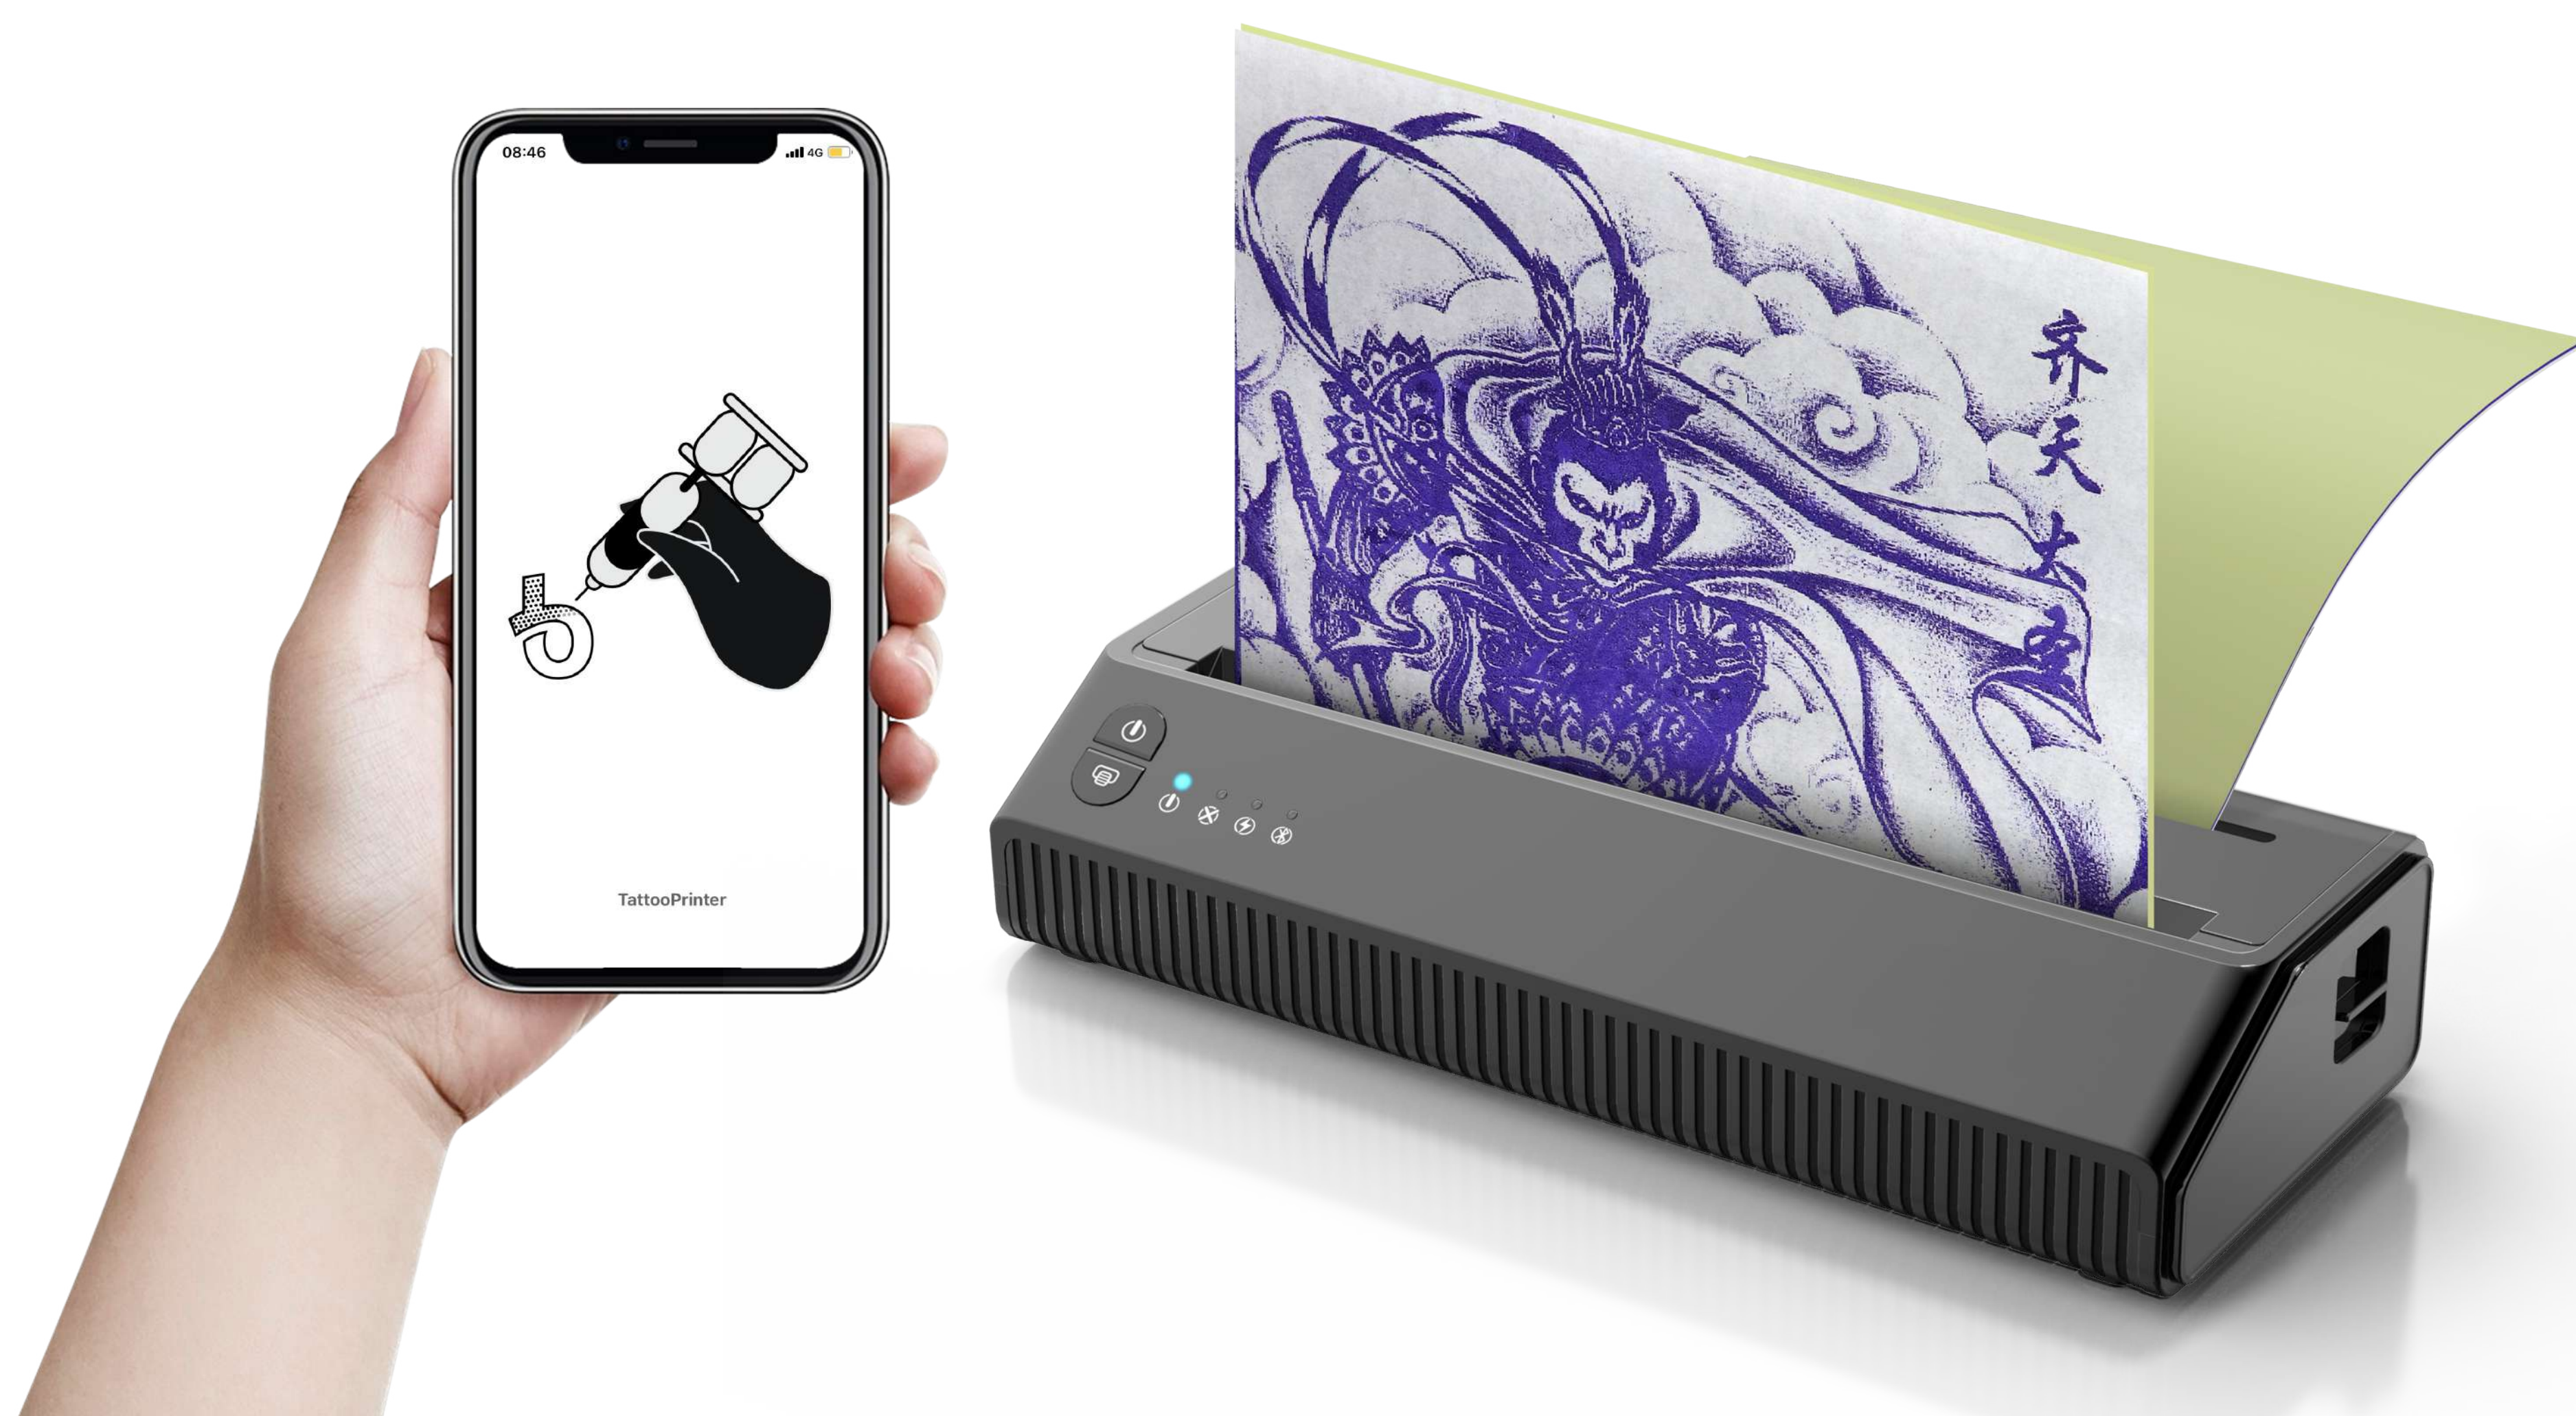

3. Insert the transfer paper with the yellow page facing up and the white page facing down, leaving a 1cm spacing at the paper outlet.

Note: When the tattoo printer is out of paper, the buzzer will sound and the error indicator will light up. It will flicker, which is a normal phenomenon.

4. After installing the transfer paper prepare your mobile phone (iOS or Android) to connect to the machine. Start printing the pattern you want.

Type	Example	Example	Recommend
Line Pattern			★★★★★ Perfect
Shadow Pattern			★★★★☆ Very Good
Gradual change Pattern			★★★☆☆ General Some details will be lost
Colorful background Pattern			★☆☆☆☆ It is bad Barely printed on light background
<p>⚠ The quality of the transfer paper will affect the printing effect. (The quality of the transfer paper is determined by the uniformity of the ink sheet.)</p>			

# Intelligent interconnection

Smart phone connection printing operation

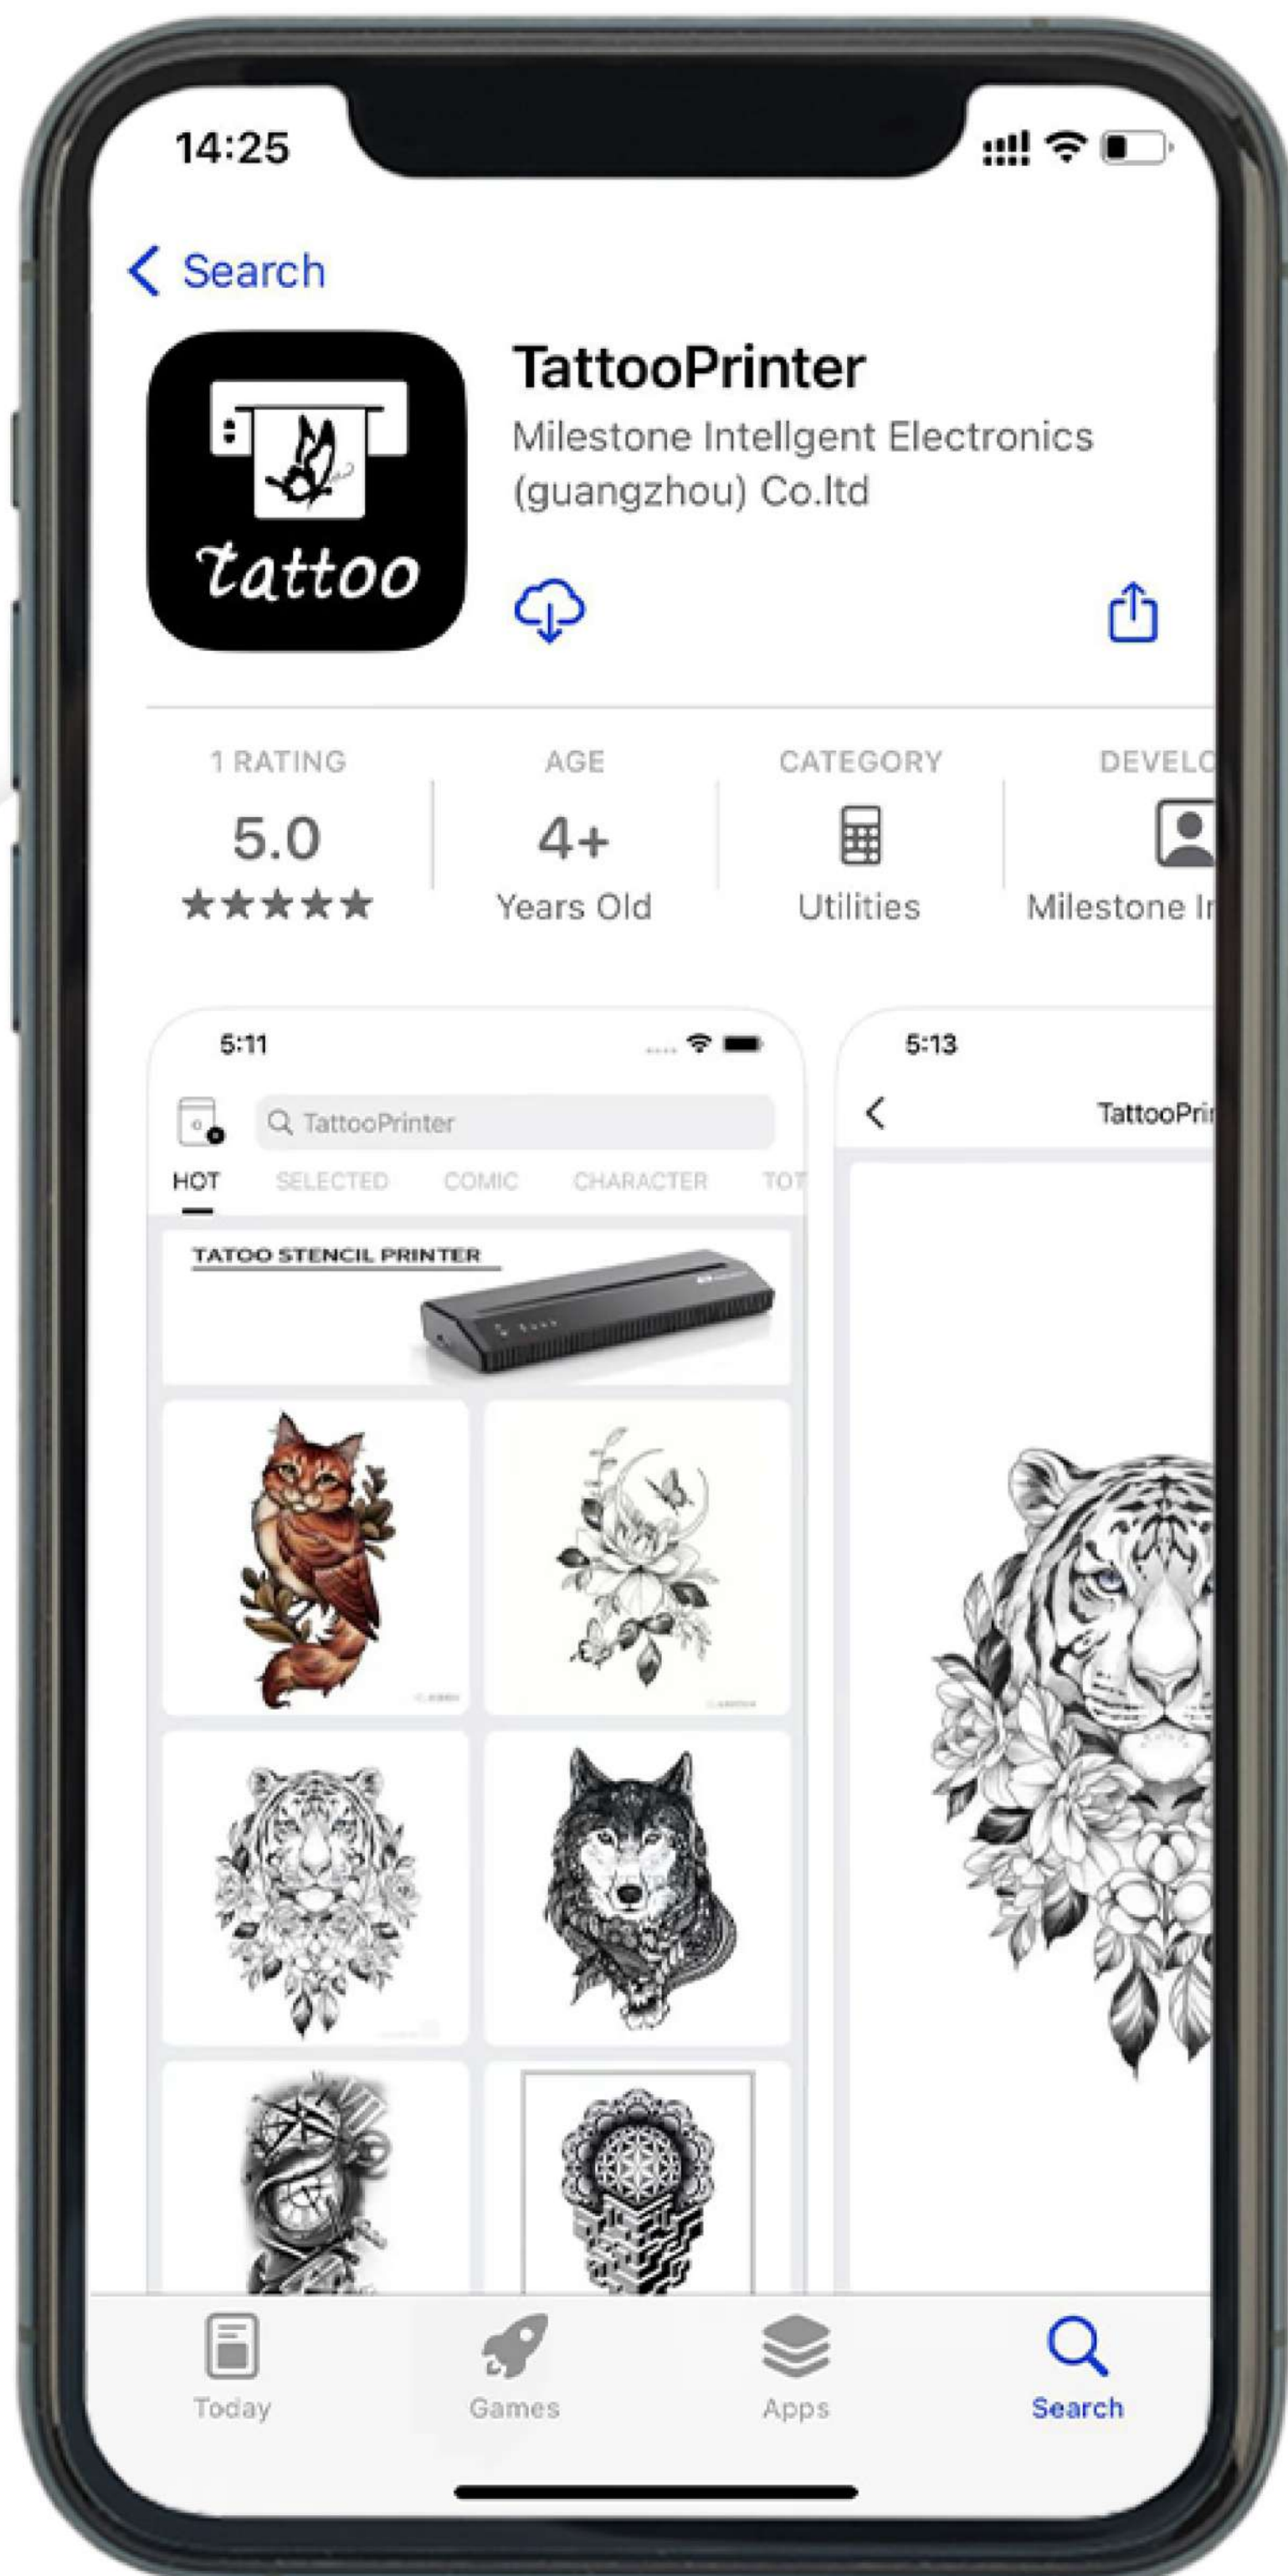

Search and download "TattooPrinter" App from iOS App Store.

Android users can download by tracing the QR code on the right.

After downloading the app, turn on Bluetooth and WiFi and connect to the printer. All other operations are the same as iOS.

Download the "TattooPrinter" App.

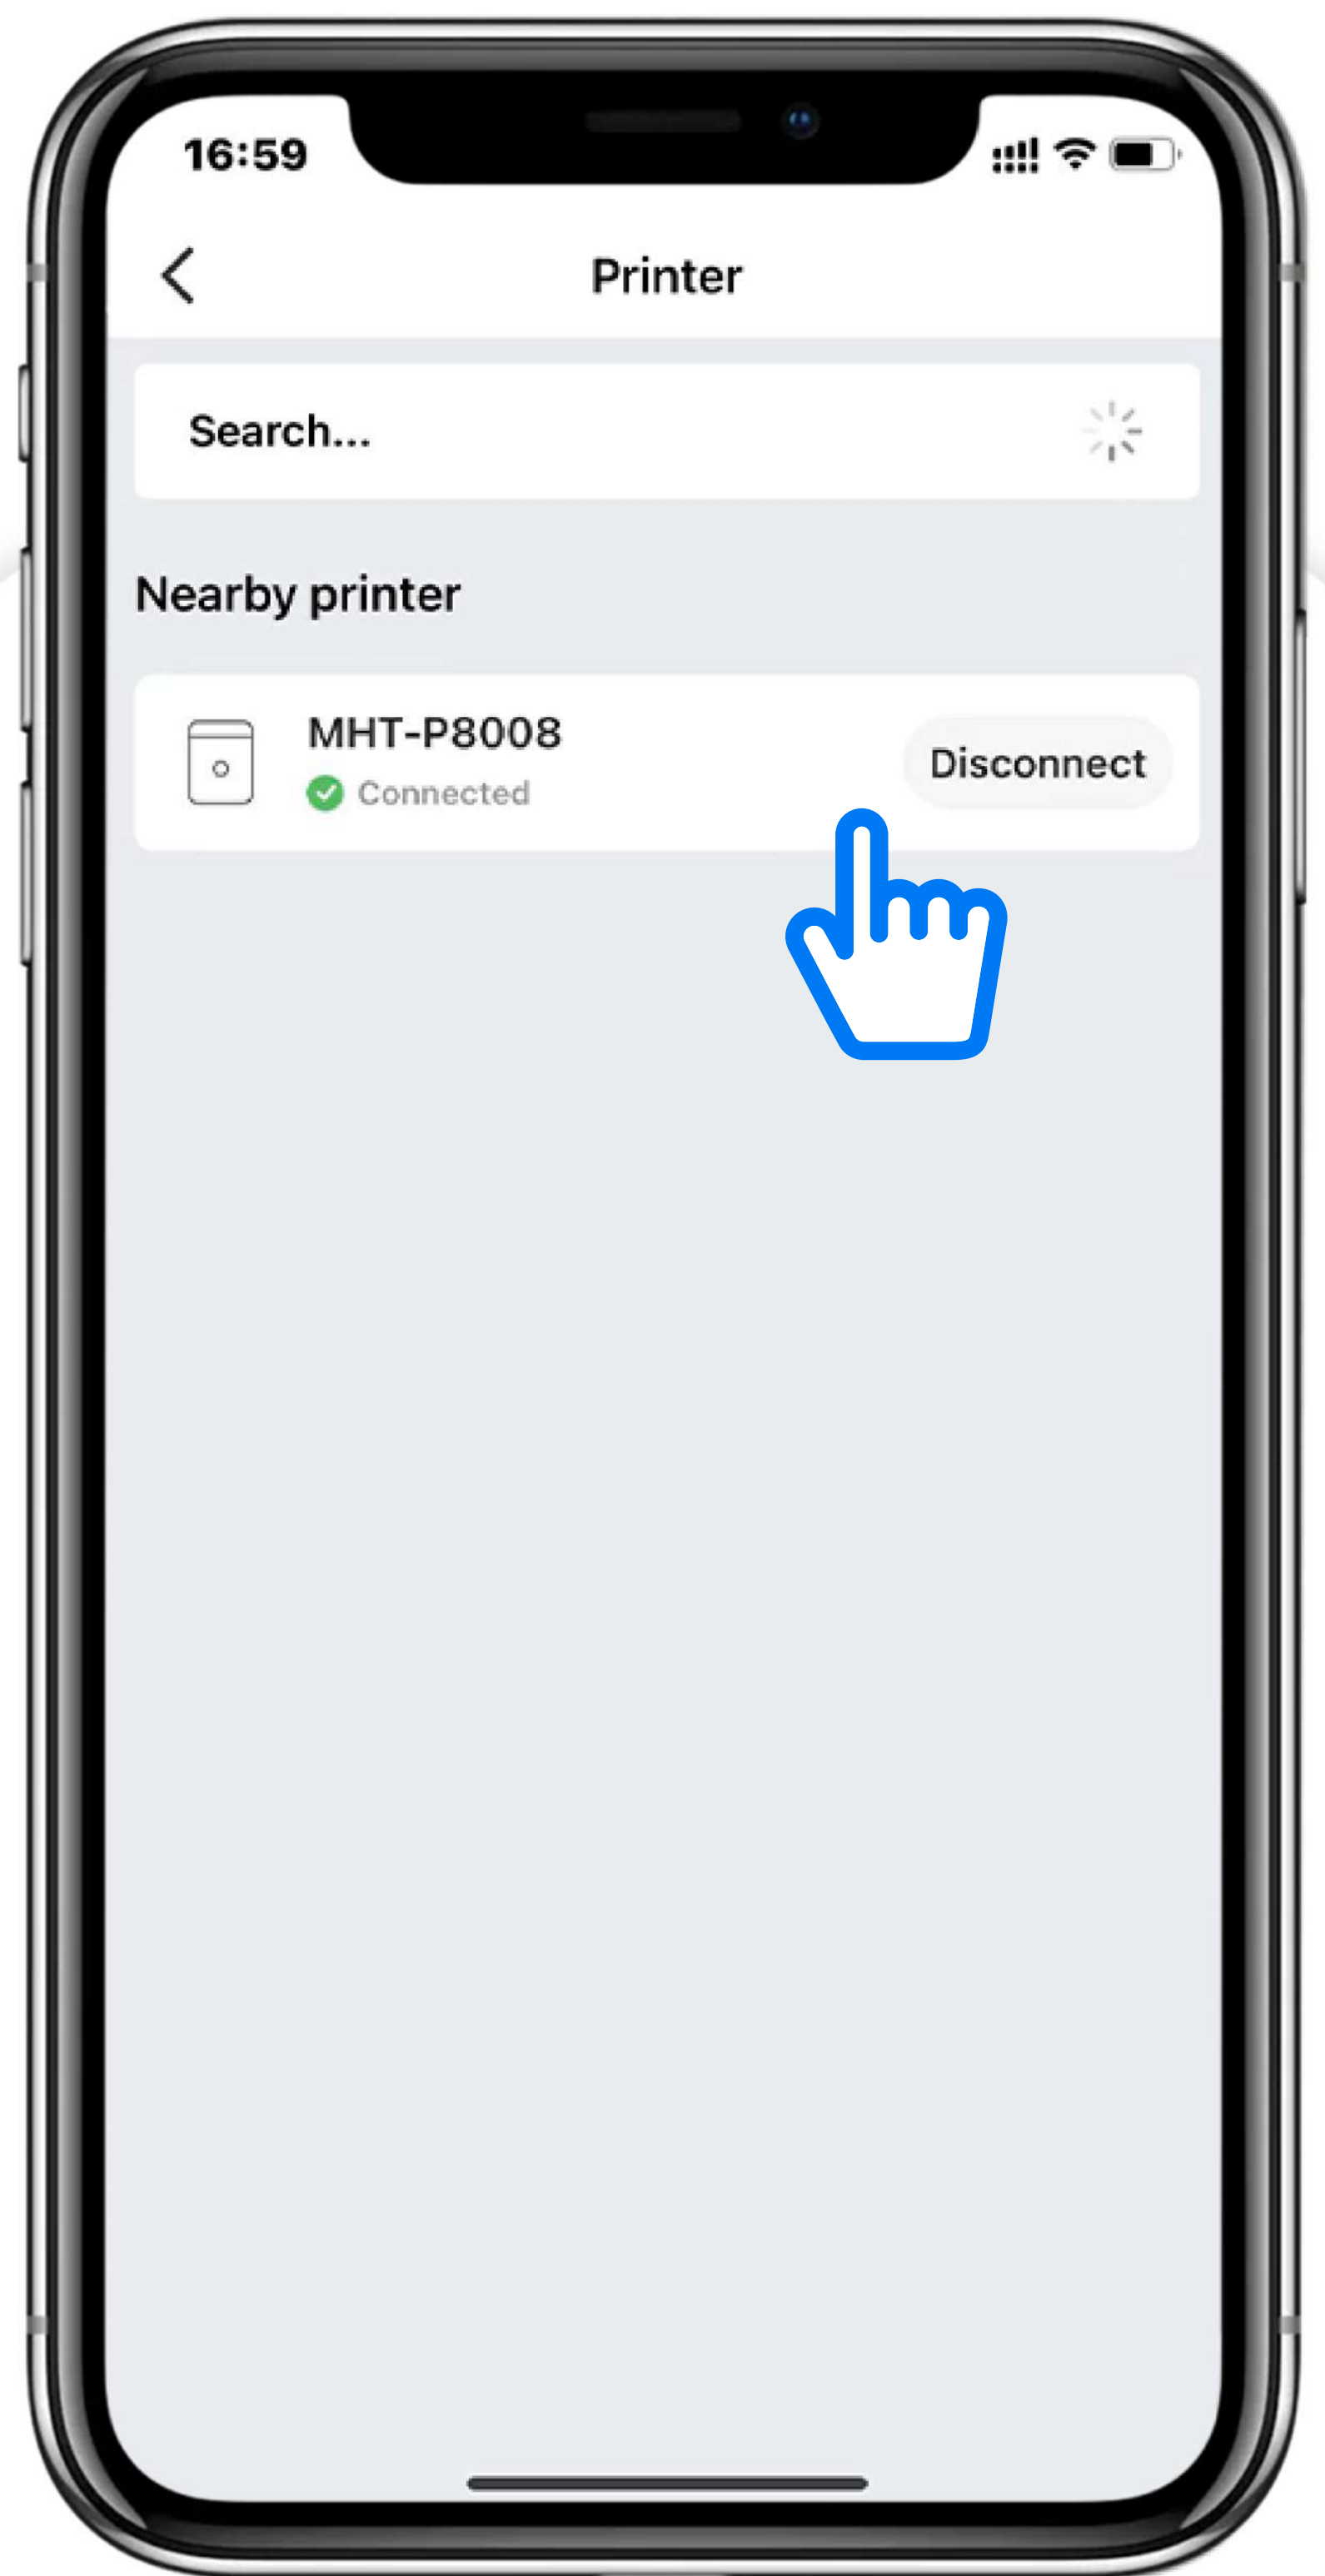

Open the app

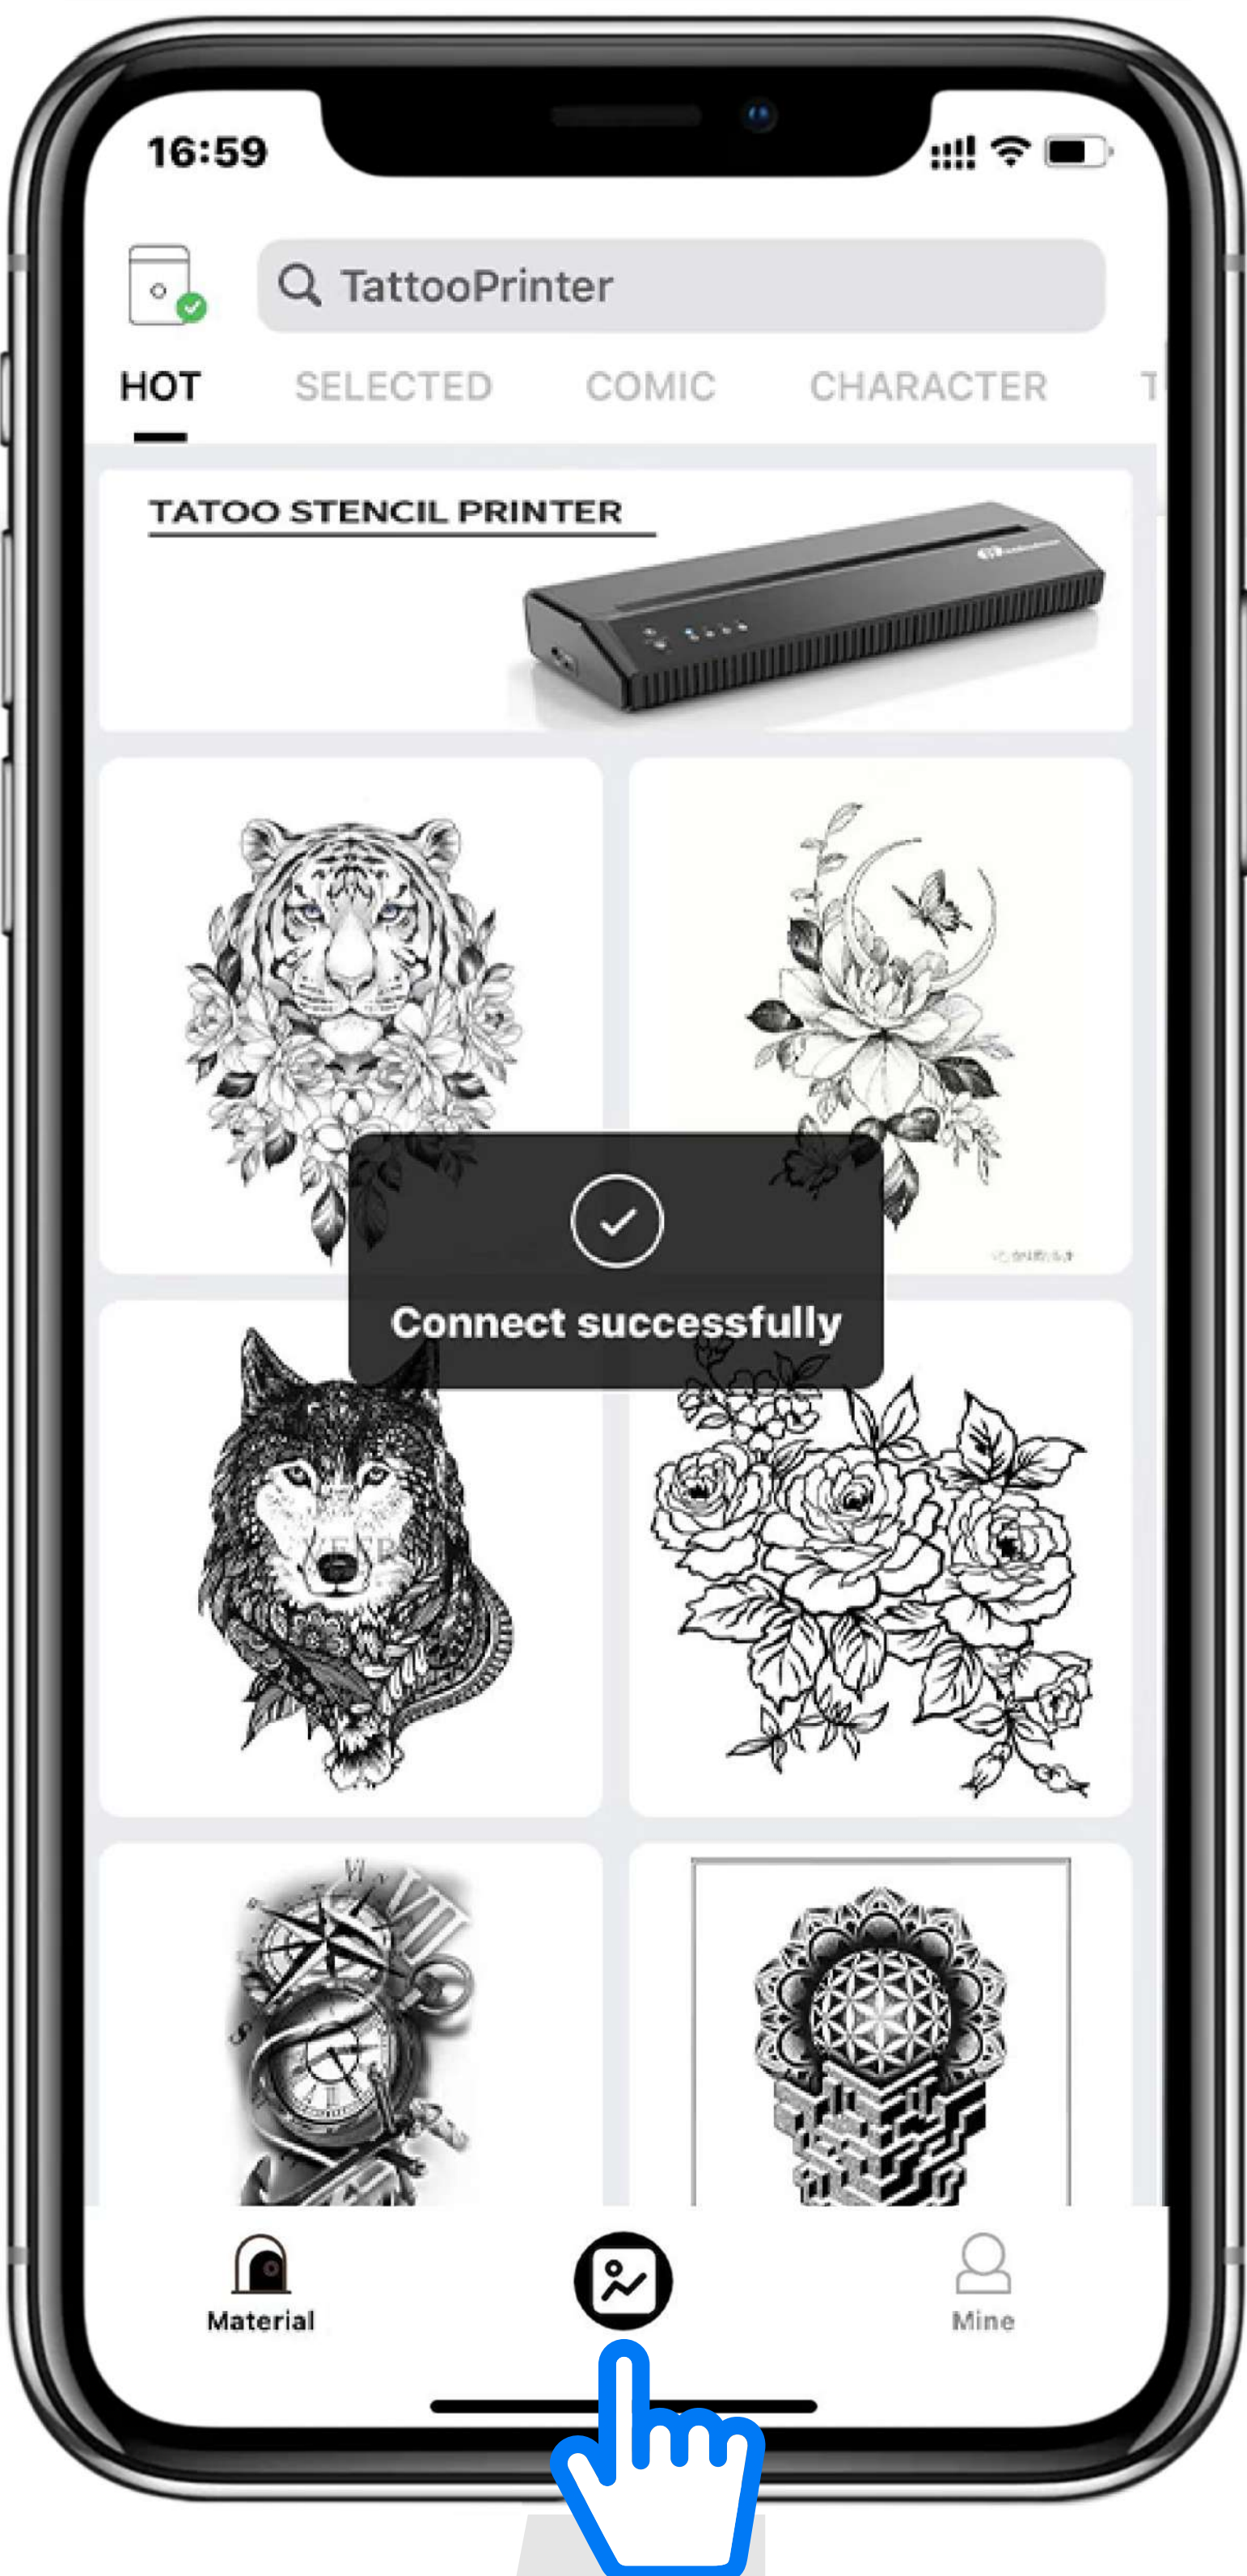

Click in the upper left corner to connect to Bluetooth.

Connection printer name  
[MHT-P8008](#)  
Default PIN: 0000

Click Image

Select a picture to print

Click **Edit** to adjust the size and position of the picture.

Click on the print icon in the upper right corner.

You can adjust the parameters, Select **Print**.

**Print successfully** appears. Wait 3~5 seconds, paper starts to come out.

# Technical support

## Technical service support

COMPUTER

Type-C connection for charging/  
data modification/printing

USB TYPE-C

This printer can be connected to a computer with the included Type-C to modify data and connect to print.

However, we **do not recommend** using a computer to connect the machine to print, the effect of connecting the computer to print is not as clear as the phone connection to print, and the process is very complicated. Because everyone's computer system and program is different, the installation of the printer driver is prone to bugs, may not be normal in the computer use of the error. Please understand clearly before you use it.

Using a cell phone for Bluetooth connection is more convenient and faster, easy to print operation, please use your cell phone to connect to use our printer.

If you are in great need of using a computer to use this printer, please contact our official technical team to send you a tutorial and software download address to connect the computer to guide you to install it.

## If you're in trouble

**Q:** The default PIN for connecting to the printer is: "0000" but I entered "0000" or it shows PIN error can not be connected, how do I need to solve it?

**A:** It may be due to the conflict between the program of the mobile phone and the printer, resulting in the confusion of the PIN program. Please contact our official technical team, and we will send you a tutorial to successfully modify the password connection.

# Matters needing attention

## Common problem

Question	Cause	Method
No pattern after printing	①The transparent protective sheet in the middle of the transfer paper is not removed. ②The transfer paper is not inserted correctly.	①Remove the transparent protective sheet from the transfer paper. ②Follow the instructions to Insert the transfer paper correctly.
Printing blur	Printer is not cleaned for a long time and consumables are bad	Clean the printer rollers and hermal bar with a non oven cloth with alcohol
The printer keeps making noise	Cover is not sealed or the carrier is not installed correctly	Cover the lid or put the paper correctly
The printer automatically turns off/ Printings intermittently	Battery depletion	Charging soon

## If you're in trouble

### Printing precautions

1. It is recommended not to print in high humidity and dusty areas.
2. If the print head is too hot after printing, do not touch it directly.
3. Do not touch the print head when changing print paper.
4. To prevent static electricity from damaging the print head, do not touch the print head.

### Precautions during charging

1. Do not forcefully insert or remove the charging cable.
2. Please disconnect the power after charging.
3. Please use the original power cord to charge, otherwise the printer may overheat, catch fire, and burn out.
4. Do not charge in high temperature environments.
5. If the wrong type of battery is replaced, there is a risk of explosion. It is prohibited to replace the battery without permission, as replacing the battery without permission will lose the warranty.

# Equipment parameters
